COTTONIL · TASK 3

Cottonil Command Center

23 tables, 540,000 orders, 8 years: what the data says and what to do next.

٢٣ جدول و٥٤٠ ألف أوردر و٨ سنين: الداتا بتقول إيه وهنعمل إيه.

Data analysis · Demand forecast · Margin and stock review

SCOPE

What we analysed

اللي حللناه

23

Tables

Sales, returns, stock, purchasing, marketing, finance and HR.

540K

Orders

Across e-commerce, retail POS and wholesale.

8

Years

From October 2018 to October 2026, 80 branches.

Every finding is checked against the other tables, then turned into a ranked action.

HEADLINE NUMBERS

Big growth, flat margin

نمو كبير وهامش ثابت

Net revenue

841.3M

EGP in 8 years

Gross margin

38.3%

the same in every year

Orders in 2025

93,384

+14% vs 2024

Revenue grew far faster than orders. The next slide shows why.

GROWTH

Growth is mostly price

النمو أغلبه سعر

Revenue since 2019

10.8×

Orders since 2019

2.1×

Prices step up every January, so revenue rises while volume grows slowly. Margin stays at 38.3% because cost moves with price.

السعر بيزيد كل يناير فالإيراد بيطلع أسرع من الأوردرات، والهامش ثابت.

DEMAND FORECAST

108,268 orders in the next 12 months

متوقع ١٠٨ ألف أوردر في الـ١٢ شهر الجاية

Versus last 12 months

+8.4%

99,834 to 108,268

Busiest month

Dec 2026

10,346 orders

Test error

2.0%

on 12 hidden months

The pattern repeats every year: high in November and December, low in February. Use it for staffing and stock.

FORECAST MODEL

Five models, one clear winner

خمس نماذج وواحد هو الأدق

Model	Error %	Avg miss
Holt-Winters, damped trend, multiplicative (best)	2.0	164
Holt-Winters, linear trend, multiplicative	2.1	170
Holt-Winters, linear trend, additive	2.5	208
Holt-Winters, damped trend, additive	3.2	273
Same month last year (baseline)	9.7	808

Each model predicted the last 12 months without seeing them. The best one is about five times more accurate than the simple baseline.

Error = MAPE. Avg miss = orders per month.

MARGIN GUARD

Discounts buy nothing

الخصومات مبتجيبش كمية

Link with quantity

0.001

correlation, close to zero

Lines with 10%+ off

19%

of all order lines

A 10% cap is worth

1.9M

EGP a year, if volume holds

Deeper discounts do not sell more units. Test the cap on one wholesale tier first, then compare with a control group.

STOCK AND MARKETING

Two numbers that do not add up

رقمين مش بيتطابقوا

Stock sits in the wrong place

23 months

of stock cover. 4 of 12 warehouses are over capacity. Women bottoms hold 9× their demand, socks only 0.29×.

المخزون متقسم بالتساوي مش حسب الطلب.

Marketing cannot be trusted

45×

Campaigns claim 24.1M orders against 540K real ones. Campaign spend is 19× what the ledger shows.

اتبع الحملات بأكواد خصم قبل زيادة الميزانية.

CUSTOMERS AND RETURNS

Customers leave quietly

العملاء بيمشوا بصمت

Lapsed customers

23,138

no order in 12 months

Their past spend

159.1M

EGP before leaving

Refunds above sale value

5,508

no refund control found

Send a win-back offer to 80% of lapsed customers and hold out 20% to measure the result. Send the over-refunds to finance for review.

HEALTH CHECK

Six problems, ranked

ست مشاكل مترتبة بالأهمية

#	Problem	Evidence	Priority
1	Marketing numbers do not add up	45×	Act now
2	Discounts give margin away	1.9M a year	Act now
3	Stock sits in the wrong place	23 months	Act now
4	Customers are slipping away	23,138	Fix soon
5	Purchasing data does not reconcile	57× cost	Fix soon
6	Master data cannot be trusted	80 of 80 branches	Fix soon

Red = act now. Gold = fix soon.

30-DAY PLAN

Four weeks, four moves

أربع أسابيع وأربع خطوات

WEEK 1

Price

Apply a 10% discount cap on one wholesale tier.

WEEK 2

Stock

Rebalance transfers. Reorder socks and men tops, pause women bottoms.

WEEK 3

Customers

Win-back offer to 80% of lapsed customers, hold out 20%.

WEEK 4

Review

Compare with the control groups and keep what works.

In month one also add promo codes and campaign tags to every campaign, and ask the data owner to confirm the critical findings.

THE DASHBOARD

One page per decision

صفحة لكل قرار

16 pages

Health check, forecast, margin, stock, customers, data quality and action plan.

Three banners

Every page states the problem, what to do and how to know it worked.

Ask the data

Plain questions get answers with numbers, with no internet needed.

Next: check every number against Cottonil’s own records, then connect live data so the dashboard refreshes by itself.
